Frequently asked

1. Which factors should be considered when choosing a photographic inkjet paper??
First, you should know what it is going to be used for, as APLI's catalogue includes over 30 products, each one suitable for a specific use.
The paper has different finishes, depending on what it is to be used for: matt, glossy, satin and photographic. They also come in different sizes.

Resolution
It should be stressed that the resolution of the image (pixels per inch), which is a characteristic of the image (camera, images off the Internet, scanned photos and so on) is not the same as the print resolution, a characteristic of the printer, which can be modified in its settings. The higher the image and print resolution are, the better the quality of the printed photo.

The grammage
The grammage is the weight per square meter of material, in this pack paper. In general, a higher grammage means greater stability and rigidity. APLI papers are from 90 to 300 grams per square meter.

2. Can APLI paper be used with any type of printer?
APLI paper is fully compatible with all the printers on the market and provide maximum quality in all packs.

3. Can inkjet paper be used in a laser printer?
No, laser technology is based on the heat given off by the printer rollers. Using inkjet paper in a laser printer could cause serious, permanent damage to the printer and the paper.

Transfer papers - A4

The most complete range of transfer paper for inkjet printers. Can be chosen according to the color of the t-shirt to be customized or the finish required. It is also important to bear in mind the type of fabric and follow the instructions supplied in each pack. All of them will produce top quality results.

To restore the "glow-in-the-dark" effect just place the item of clothing under a light source for a few minutes.

Creative studio - A4

Magic plastic, tattoo paper, glow in the dark labels, magnetic paper... A complete range to create magnets with your favourite photos, design your own invitation cards, personalize key rings or create decorative elements that glow in the dark in children's rooms. Endless possibilities!

Magic plastic INKJET

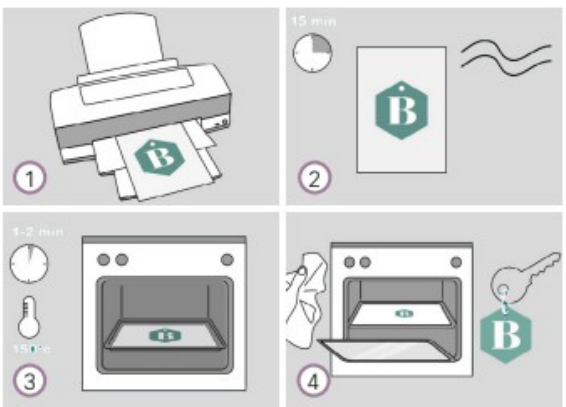

Ref. 10331

4 sheets
SU 1 · SP 65

Ideal for customizing key chains and necklaces

Our tip: Make a hole in the design with a paper punch before putting it in the oven; you will then be able to pass a thread through to make a necklace or a ring for a key ring.

Print your designs, cut, place in the oven (supervised by an adult) and, as if by magic, the figures shrink and become thicker.

They do not harm your skin, dermatologically tested

Our tip: Tattoos are not only for use on skin, you can put them on your mug, on your mobile phone or your computer mouse, use them to decorate your nails and many more possibilities.

The tattoo can be easily removed with soap and water.

APLIADVICE

HYDROALCOHOLIC GEL

Hydroalcoholic gel strongly disinfectant and effective due to its 70% alcohol content. Cleans and provides total hand hygiene without the need to use water. Manufactured according to anti-viral regulations.

COMPRESSED AIR

Ideal to get to hidden corners. Dirt and dust enter the office and lurk in hidden places. With the compressed air and the tube, you can reach it, dislodging dirt in a keyboard or removing the dust from your computer fan to improve cooling.

WIPES

Your screen in perfect condition. Monitors and screens, due to the electrostatic energy they can emit, are great receivers of dust. To keep your computer, laptop, phone or tablet screen clean, APLI offers wipes in different formats to suit your use.

Sealing tapes

APLIADVICE

TAPE WITH PP SUPPORT

Very good value for money. PP is a flexible and tough material. According to the microns of film and type of adhesive, it can be a product that is excellent value for money or a very strong product. We only need to increase the thickness and add a strong adhesive.

TAPE WITH PVC SUPPORT

A PVC film gives great consistency to the tape. The PVC material gives the tape a great deal of rigidity and makes it very tough, offering 35 microns for a Premium product. As well as being a noiseless tape.

TAPE WITH ACRYLIC ADHESIVE

The acrylic adhesive is water-based. More ecological. Available with or without noise. Acrylic tape with noise is the standard product, offering good adhesion and excellent value for money. Acrylic noiseless adhesive has excellent quality and is recommended for all types of use.

TAPE WITH SOLVENT ADHESIVE

Doubtlessly the highest quality adhesive, made from natural rubber and tree resin. Providing great adhesive power on any surface. Recommended for heavy boxes.

Adhesive products

APLIADVICE

PAPER AND CARBOARD

For these porous materials, the ideal adhesives are white glue, glue sticks and water glue. Solvent-free adhesives, also ideal for school use.

EVA FOAM AND PLASTIC

To efficiently stick plastics and derived products, the ideal glue is silicone or universal glue, as they are tougher. If you need quick drying, you can also try the super adhesive or a hot glue gun.

WOOD, LEATHER AND FELT

For wood, you can use the special wood glue, white glue or universal glue (for models) or contact adhesive for strong attachment. For leather or metal, we recommend contact or silicone adhesive. For felt, the best product to use is textile or universal adhesive.

STICKERS AS A POSITIVE REINFORCEMENT

In addition to educational stickers in geometrical shapes, there are also educational stickers with faces and expressions that can be used to reward children's effort and achievement.

For example, small routines such as putting away toys, doing homework, eating well, not being punished in the classroom, washing their teeth or helping with household tasks, can be learnt and acquired by means of a reward system.

Glow in the dark INKJET

Ref. 10248

SU 1 · SP 70

The white areas in the printed design will be the parts that glow in the dark

To restore the "glow in the dark" effect just place the item of clothing under a light source for a few minutes.

Creative studio - A4

Magic plastic INKJET

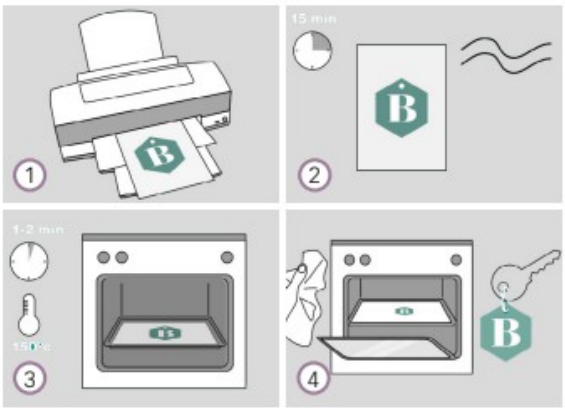

Ref. 10331

4 sheets
SU 1 · SP 65

Ideal for customizing key chains and necklaces

Our tip: Make a hole in the design with a paper punch before putting it in the oven; you will then be able to pass a thread through to make a necklace or a ring for a key ring.

Print your designs, cut, place in the oven (supervised by an adult) and, as if by magic, the figures shrink and become thicker.

Tattoo paper INKJET

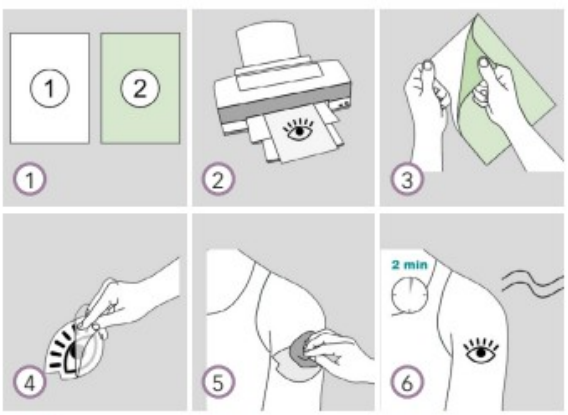

Ref. 11295

2 sheets
SU 1 · SP 60

They do not harm your skin, dermatologically tested

Our tip: Tattoos are not only for use on skin, you can put them on your mug, on your mobile phone or your computer mouse, use them to decorate your nails and many more possibilities.

The tattoo can be easily removed with soap and water.

Glow in the dark stickers INKJET

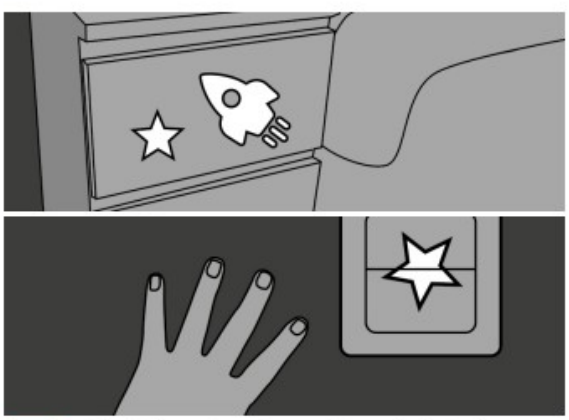

Ref. 10424

5 sheets
SU 1 · SP 65

The part that is not printed is the part that glows

Our tip: The glow is recharged easily by placing the stickers under a light source.

The A4 format can be used to make lots of designs and you can cut them out with scissors, obtaining fun stickers that glow in the dark.

Print many different designs and then cut them out with scissors

Our tip: This year, instead of sending the typical Christmas card, we suggest the idea of printing a family photo with Christmas motifs and sending a fun useful refrigerator magnet for Christmas. It will be a unique and original Christmas greeting!

Personalize magnets with photos of your loved ones, pets, etc.
